Flutter Developer

PROFESSIONAL SUMMARY

With over three years of experience as a skilled Flutter developer, I specialise in creating user interfaces and mobile applications using Flutter and Dart. My expertise includes unique widgets, API integration, effective UI/UX design with animations, and different payment gateways. Additionally, I have experience with NodeJS API creation and managing the team.

EXPERIENCE

Full Stack Developer, Somnath Infotech

January 2024 - March 2024

Create and manage Node.js apps with performance and scalability in mind.

Using React.js, create and develop responsive user interfaces to provide smooth user experiences.

Using Flutter, create cross-platform mobile apps that work consistently on both iOS and Android platforms.

Work together with team members and project managers to ensure that deliverables and milestones are met on schedule.

Junior Software Engineer, Drevol Software LLC, India, Vadodara

July 2022 - November 2023

Build cross-platform mobile apps using Flutter, emphasising user experience and performance.

Work together with team members and project managers to ensure that deliverables and milestones are met on schedule.

Flutter Developer, TechMET Solutions, India, Nashik

July 2021 - July 2022

Create and develop complex Flutter applications.

Create unique Flutter packages by utilising the features of the native platform.

Convert designs into responsive, high-caliber UI code.

Developer Track Intern, Magical Solutions, India, Indore

January 2021 - June 2021

Under supervision, support the creation and testing of Flutter apps.

Work together as a team to translate UI/UX designs into usable code.

Gain practical experience and learn how to implement best practices for Flutter development.

Flutter Developer Intern, Fintech IT Solutions LLP, India, Jodhpur

May 2020 - December 2020

Assist in developing and testing Flutter applications under supervision.

Contribute to documentation efforts and knowledge sharing within the team.
